Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: . . . human system. All of us have seen instances in which amputations were performed upon patients severely shocked from accidental injuries, yet with a successful result. But I have repeatedly seen such operations end badly, reaction seeming to be checked, and all the symptoms aggravated from the beginning of etherization. Many years ago I became satisfied that the effect of the inhalation of ether affords a tolerably fair test of the propriety of operation. A few whiffs of it may be given, the pulse being carefully watched; if this gains in force and volume, and becomes slower, the other symptoms will probably decline also, and the administration can be continued until the patient is ready for operation. If the pulse flags or becomes irregular the ether should at once be withdrawn. --Jno. H. Packard, of Philadelphia, in Medical Standard. The Importance Of Attitude In The Auscultation Of Children. --Dr. Azoulay, of Paris, says that the difficulty often experienced in analyzing and localizing abnormal heart-sounds in the very young is known to most of us. The reason is that in the child the following elements come into play--viz. , great rapidity of heart-beats, the complicated character of the bruits and their c vagueness. In such cases the puzzled practitioner contents himself with the hypothetical diagnosis of peri-and endo-carditis. Dr. Azoulay states that he has devised a means of rendering the problem much easier of solution. Dr. Jules Simon and himself have applied the method at the Paris Childrens...
