Brand New Book ***** Print on Demand *****.Army Techniques Publication ATP 6-02.53 Techniques for Tactical Radio Operations January 2016 replaces Field Manual (FM) 6-02.53, Tactical Radio Operations and expands on the foundation of tactical radios operations found in FM 6-02, Signal Support to Operations. ATP 6-02.53 incorporates numerous changes. The Integrated Tactical Networking Environment is a combination and evolution of all three concepts through the integration of the software based networking radio technologies, and mission command mounted and mobile applications management. Communications and mobility are key enablers of mission command in support of the execution of successful unified land operations. Communications must support the Armys aim to seize, retain, and exploit the initiative to gain and maintain a position of relative advantage over the enemy in sustained land operations. Army forces must be able to move repeatedly and communicate. Tactical situations change rapidly during sustained land operations, requiring tactical radios that are versatile and readily adaptable to rapidly changing tactical situations. Communications in support of unified land operations require the employment of communications capabilities at squad level and higher echelons. Communications at the squad level enables communication and situational awareness at the lowest level possible. ATP 6-02.53 contains 12 chapters and 9 appendices Ch 1 provides an overview of tactical radios, tactical radio networks, capabilities, and network management. Ch 2 addresses the employment of tactical radios at all echelons throughout the Army. Ch 3 addresses the tactical radio platforms and associated waveforms that Army forces employ at all echelons across all phases of operations. Ch 4 discusses the waveform and waveform application functional component of the tactical networking environment. Ch 5 describes the commercial-off-the-shelf very high frequency radios used to support tactical...
